## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-9 and 14-18 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claims 1-9 and 14-18. There is no prior art of record that teaches a method of manufacturing a substrate for a liquid-crystal display device comprising steps of: forming a resin layer on a substrate; selectively- reforming the surface portion of said resin layer by applying energy with an energy per unit time of a prescribed value to generate a difference in rate of thermal shrinkage between said surface portion and the layer portion other than the surface portion in said resin layer; performing a heat treatment to form random wrinkles of micro-grooves in said surface portion; and forming reflective electrodes on said surface portion.

Tsuda as previously cited teaches a method of manufacturing a substrate for a liquid-crystal display device comprising steps of: forming a resin layer on a substrate; selectively- reforming the surface portion of said resin layer by applying energy with an energy per unit time of a prescribed value to generate a difference in rate of thermal shrinkage between said surface portion and the layer portion other than the surface portion in said resin layer and a heating step however the end product of Tsuda results in forming a curved electrode structure. Heat treatment in the current invention forms a curved structure however forms micro-grooves as shown in figure 14C of the current application which does not occur in Tsuda.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
